

WORK EXPERIENCES

- **Job Title I**

City, Province, Country, 01/2018 - 01/2018

The short description of your team, company, especially when your company was a local company or not as known as Google, then you definitely want the recruiters to know about it.

 - This is the top list, you can use it to describe your main role
 - Detail 1: I wrote code.
 - Detail 2: I created bugs.
 - Detail 3: I fixed bugs I created.
 - Detail 4: Then I wrote more code and bugs.
 - Detail 5: Shit, I forgot to write the tests. (this is not something you want them to know tho lol)
 - Hits: When the detail is not as long, you should include `class="indent-right"` in the scope of *li*.

 - Keep your other experience some how related to your job, or some how it could assisted your soft skills.
